PRESENTATION

The lesson has been prepared to provide some tips for scientists who are aiming to write a journal article on their research results.

Knowing how to write papers that other practitioners want to read and cite is an essential skill for any scientist, but it is rarely taught to researchers of science and technology. Writing is, however, an important part of our jobs. We are writers, whether or not we want to be, and the quality of our writing is relevant to our careers.

Of course, to write a good scientific paper, you have to do some good science first.

You cannot compensate for bad science with good writing. However, if you have done solid science, it deserves to be heard about, and it helps if you know how to communicate your results clearly and in a compelling way. It also helps if you can write quickly, without spending too much time being stuck or in fear of the blank page.

OBJECTIVES

The aim is to offer a set of guidelines, a system for useful writing. This may make writing less taxing because it forces to focus on the right things at the right time, one thing at a time.

PARTICIPANTS

The African participants come from National Veterinary Laboratories and Veterinary schools of Northern and Southern Africa.

AGENDA

CHAIRMAN

Mauro Mattioli

Emeritus Professor

UNITE

17 March 2022		
TIME	TOPIC	TRAINER
10.00 – 10.10	Opening and welcome	<i>Massimo Scacchia</i> ERFAN Secretariat IZSAM, Italy
10.10 – 11.00	Writing a Scientific Paper: the method	<i>Mauro Mattioli</i> Emeritus Professor UniTE, Italy
11.00 – 11.15	BREAK	
11.15 – 11.45	Participants questions and clarifications	All participants
11.45 – 12.00	Conclusion and closure of the event	All participants
