## PRESENTATION

The training course on detection of *Listeria monocytogenes*, *Klebsiella pneumoniae* and *Salmonella* spp. has the purpose to deepen topics related to these pathogenic microorganisms and to share technical-scientific updates on analytical methods used in laboratory for testing, molecular typing, and whole genome sequencing. The training will deal with detection of *Listeria* spp. and *Listeria monocytogenes* in food, food producing environments and animals, according to ISO 11920-1:2017 and ISO 11920-2:2017 as well as the detection and isolation of *Salmonella* spp. in foods according to ISO 6579-1:2017. The training will also cover the detection, identification and characterization of antimicrobial resistance of *Klebsiella pneumoniae*.

Moreover, typing will be discussed, based mainly on whole genome sequencing.

## OBJECTIVES

At the end of the training, the participants will be able to detect and characterise the species of interest.

## TUTORS

The tutors are representative of the Central Veterinary Laboratory of Namibia (CVL), the University of Namibia, School of Veterinary medicine (UNAM), the Food Hygiene laboratory of Istituto Zooprofilattico Sperimentale del Piemonte, Liguria e Valle d'Aosta (IZSPLV), the WOAHA Collaborating Centre for Animal Production Food Safety (WOAHA CC FH) and the Italian National Reference Laboratory for *Listeria monocytogenes*.

## PARTICIPANTS

Eligible participants are ERFAN partners of Northern and Southern Africa.

The Italian Embassy in Pretoria, the Namibian CVO will participate at the training course Opening ceremony.
